

ABHISHEK VERMA

QA Automation Engineer

Noida, India

abhishek.verma1268@gmail.com | +91-7991808279 | LinkedIn: [abhishek-verma-87880523a](#)

PROFESSIONAL SUMMARY

Results-driven QA Engineer with 3.7+ years of experience delivering high-quality software through manual and automation testing across web, mobile, and API platforms. Proven expertise in building scalable test automation frameworks using Selenium, Cypress, and Appium, reducing regression testing time by 40%. Strong background in Agile/Scrum methodologies, CI/CD integration, and cross-functional collaboration. Seeking to leverage my QA expertise within innovative software companies.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Kotlin

Automation Frameworks: Cypress, Appium, TestNG, JUnit, Cucumber (BDD), Page Object Model (POM)

Testing Types: Manual Testing, Automation Testing, API Testing, Integration Testing, UAT, System Testing, Mobile Testing, Windows Application

Tools & Platforms: Postman, Selenium, Git, Jira, Jmeter, Trello, Zoho, Eclipse, IntelliJ IDEA, Figma

Databases: MySQL, SQL Server

PROFESSIONAL EXPERIENCE

QA Tester | Real11 Fantasy Sports (Orvantis)

January 2025 – Present

Noida, India

- Design and execute 500+ test cases for web and mobile applications, achieving 95% test coverage across gaming, trading modules, dating and Astrology application. Good knowledge in Audio and Video call and chat functionality testing.
- Perform comprehensive API testing using Postman.
- Conduct UI validation against Figma designs, ensuring pixel-perfect implementation and consistent user experience.
- Execute functional, regression, and integration testing in Agile sprints, reducing production defects by 30%.
- Collaborate with cross-functional teams (developers, product managers) to identify root causes and improve product quality and provided many client demos.

Quality Assurance Executive | Augurs Technologies Pvt Ltd

August 2022 – October 2024

Lucknow, India

- Developed and maintained 200+ automated test scripts using Selenium WebDriver and BDD Cucumber framework, reducing manual testing effort by 40%.
- Executed end-to-end testing for web, mobile (Android/iOS), and Windows applications across 10+ client projects.
- Performed UAT, regression, and system testing, ensuring 98% client satisfaction rate through quality deliverables.
- Created detailed test plans, test cases, and defect reports using Jira, improving defect tracking efficiency by 25%.
- Communicated directly with international clients to gather requirements and delivered quality software on schedule and provided many project demos to overseas clients.

KEY PROJECTS

E-Commerce Platform – Test Automation Framework

- Built BDD automation framework using Selenium + Cucumber, automating 150+ test scenarios for cart, checkout, and order management for E-commerce website.
- Improving code maintainability and reducing test maintenance time by 35%.

CRM System – Cross-Platform Testing

- Conducted cross-platform testing (web + mobile) ensuring seamless data synchronization across devices, Google and custom email testing, chat and clocking in/out within defined location parameters.
- Validated real-time features including chat, email integration, and live updates with 99.5% accuracy.

ERP System – Enterprise Quality Assurance

- Created comprehensive test plans, Requirements Traceability Matrix (RTM), and defect reports for multi-tenant enterprise system.
- Executed cross-platform compatibility testing across Windows, macOS, and Linux environments.

EDUCATION

Bachelor of Technology (B.Tech)

BBDNITM, Lucknow | 2014 – 2018

CERTIFICATIONS & ACHIEVEMENTS

- Software Testing Certification (Manual + Automation) – CETPA
- Performance Award – Augurs Technologies (Recognized for exceptional testing quality and client satisfaction)
